Biochemistry Laboratory Research Assistant Position

Our research aims to exploit the molecular recognition elements affecting chemical and biological transformations. We are currently investigating how recalibration of protein prenylation can lead to novel treatment for age-related cancers

Seeking applications for a Research Assistant to participate in Biochemical and Biological Evaluation Studies conducted jointly at McGill University and the McGill University Health Center (MUHC)

Position Title: Research Assistant

Starting Date: February 1, 2021

Initial End Date: January 31 2022 (renewable)

Hours per week: 35 hrs/week

Salary: Depending on qualifications

Qualifications: MSc in Biochemistry with experience in enzymology, protein expression and purification, running *in vitro* and cell-based assay, MTT assays, Western blot analysis and Flow cytometry studies.

Duties:

- 1) Conduct biological assays *in vitro*, *ex-vivo* and *in vivo*
- 2) General maintenance of a “hot” lab facility, maintenance of cell lines, operation of a fermenter and all necessary functions associated with the required studies (refer to qualifications for details)

Date of Posting: December 21, 2020

Expiry date of Posting: as soon as position is filled
